

Nicole Stalter, MSN, ANP, FNP-C Family Nurse Practitioner

Nicole Stalter was drawn to the health care profession as a teen when she helped care for her grandfather, who had lung cancer. “I believe in showing patients I care about them and their health through listening, eye contact and thoughtful conversation,” explains Nicole. She relishes getting to know her patients and what is important to them. “I also believe patient education is vitally important in helping patients to care for themselves and make better choices for their health and well-being.”
